

Customised Equipments for Testing and Automation

Testing Equipments

Special purpose Test Benches for measuring various parameters such as

Speed - Torque - Voltage - Current - Resistance - Power
Pressure - Flow - Air / Vacuum Leak - Durability - Gas
trace leak - Environment testing - Noise - Vibration
Distance and Rotation - Frequency

Typical Products tested includes

Pumps Valves Motors - Mechanisms and Assemblies
Parts and Auto Components - Sensors and Transducers
Electrical Accessories

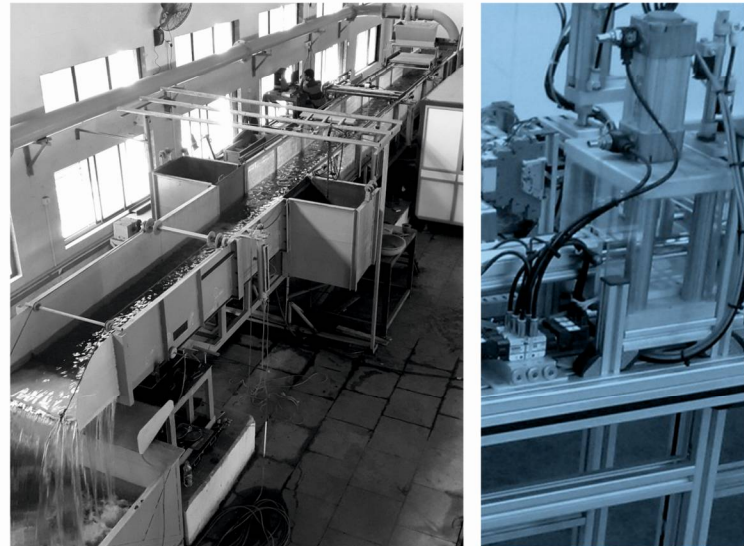

Automation Equipments

Automation Equipments build to order as per customer needs such as

Assembly Benches - Jigs & Fixtures - Robotics and
Handling - Transfer Systems - Control Systems - Vision
Systems

Typical Sectors served by us includes

General Engineering Industries - Academic Research
Labs - Automotive Sector - Pharmaceutical and Medical
Industries - Plastic Industries - Aerospace & Defense
Industries

Quality Certified - Over 150+ Satisfied Clients - Experienced Engineering Team
